

File	ESLint	Issue Description	Fix Applied	Result
Toast.tsx	react-refresh/only-export-components	File exported both showToast function and ToastContainer component	Moved utility logic, showToast, types, handlers, to toastUtils.ts and kept only component export in Toast.tsx	ESLint error resolved and proper component structure
RecipeModal.tsx	react-refresh/only-export-components	File exported both getRecipeImage function and component	Created recipeUtils.ts and moved helper functions there; kept only component in RecipeModal.tsx	ESLint error resolved and improved separation of concerns
DietAndMeals.tsx, MealPlan.tsx	TypeScript TS2614	showToast imported from wrong file after refactoring, causing CI/CD failure	Updated imports to ../layout/toastUtils	TypeScript errors resolved and CI/CD pipeline passes
server.js	no-undef	Variable data used outside its scope	Declared data outside the try block so it is accessible	Runtime error risk removed and ESLint issue fixed
server.js	no-unused-vars	Password variable assigned but not used.	Renamed to _password and updated ESLint varsIgnorePattern	ESLint warning resolved and intent clearly expressed
